

How to The MACS VPN Android boxes/devices

There is two ways of installing our app on an Android box,

1st way (FIRE DL METHOD)

Open up google app store, search for an app called "FIRE DL" and download this

Make sure Apps from unknown sources is ON

Example of app logo is below

2nd way (STANDARD INTERNET BROWSER METHOD)

Open up your web browser on your android box/device type the full url below into address bar and click ok the app should then start downloading

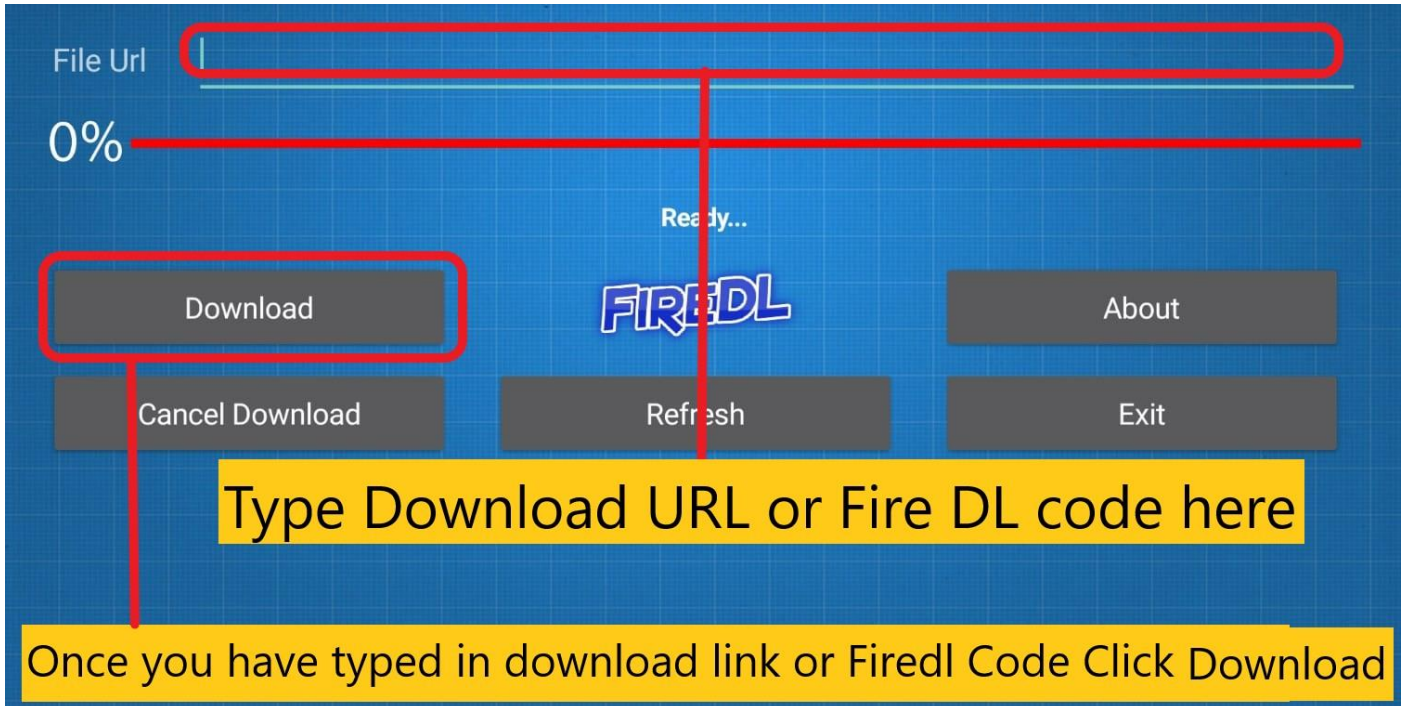

<http://download.macsiptv.co.uk/macsvpn.apk>

**Please make sure if you use the download URL that you type it exactly as you see it here
no CAPS letters**

Once downloaded the app should be in download folder open this up and install then the app will be on your app home page

If this method does not work then you will have to use the FIRE DL method

Once downloaded open the app you will then see the same screen as below

To download Our MACSQ app please use the following information below

Download URL: <http://download.macsiptv.co.uk/macsvpn.apk>

Please make sure if you use the download URL that you type it exactly as you see it here
no CAPS letters

Once downloaded the app will need to be opened and installed from your downloads
folder in your devices file manager

**YOUR LOGIN DETAILS FOR THE MACS VPN APP WILL BE SENT TO YOU ONCE PURCHASED,
YOUR APP OR WEBSITE LOG IN WILL NOT WORK TO ACCESS THE VPN**
